melanopro (in clinic)

skin condition
Hyperpigmentation concerns – sun spots, post-inflammatory hyperpigmentation, melasma, dull skin, rough texture.

description
Melanopro Peel System is a clinical-strength peel program that delivers visible results in less than 6 weeks. This transformative 2-phase regimen reveals smoother, brighter skin while working overtime to counteract environmental skin damage, fade dark spots, and reduce the appearance of hyperpigmentation.

benefits
- Fade dark spots
- Reduce appearance of hyperpigmentation
- Smooth skin's texture

featured professional products
- PreCleanse
- Special Cleansing Gel
- Magnetic[+] Afterglow Cleanser
- UltraCalming Mist
- Melanopro Peel System

how it works

1. **Prepare + Prime**
   Professional cleansing and exfoliation prepare skin for optimal treatment performance.
2. **Peel + Correct**
   The clinical-strength Day One Peeling Masque accelerates skin renewal to visibly reduce the appearance of hyperpigmentation and uneven skin tone.
3. **Maintain + Brighten**
   The Phase 2 homecare regimen helps maintain visible results, promote a brighter, more even-looking complexion, and minimize the appearance of future discoloration.

---

treatment protocol

I. double cleanse
1. Perform an eye and lip cleanse with **PreCleanse**.
2. Perform 1st cleanse with **PreCleanse**.
3. Perform professional Face Mapping skin analysis to determine the duration of **Day One Peeling Masque** on the skin.
4. Perform 2nd cleanse with **Special Cleansing Gel** or **Magnetic[+] Afterglow Cleanser**.

II. day one peeling masque application
1. Apply gloves.
2. Dispense **Day One Peeling Masque** into cup.
3. Apply using a spatula over entire face and stop at jaw line. Use the entire tube as the skin should be completely covered, avoiding the lips and eye area; be cautious around the nose and mouth.

III. monitoring skin response
1. Leave **Day One Peeling Masque** on for a minimum of 1 hour or a maximum of two hours.
   - During the wait time, you may offer a **Scalp Relief Touch Therapy**.
   - Option to put on calming meditation music.
   - During this time review the Client Resource: Phase 2 At Home Guide.
   - Set a time to check in with your client every day to track progress.

IV. removal of day one peeling masque
1. Remove using tepid water on damp esthetic wipe, option to use cool steam towel for any residue left on the skin.
2. Spritz with **UltraCalming Mist**.

V. Send Client home with Melanopro Peel System and provide "Client Resource: Phase 2 At Home Guide."
1. Email or print the At Home Guide for your client.
